Cost Analysis for High Power Stereo
Comparator Head (4 each)

Dear Bill:

25X1A

[Redacted] is pleased to submit for your consideration
a cost proposal for (4) High Power Stereo Comparator Heads. Our
cost analysis is attached.

As you will note, the amortization of engineering costs results
in a decrease of direct cost per instrument of [Redacted]. The increase
from 3 to 4 units will not effect the actual manufacturing costs
and testing costs of each unit. Delivery of the first unit is
estimated to begin 4½ months from the date of contract and follow
at the rate of one instrument every two weeks thereafter.

25X1A

If you have any questions concerning our proposal, please contact
the writer directly.

Very truly yours,

[Redacted]
